

Changes in Leadership

From Utah to Kentucky, each manufacturing plant has experienced exciting leadership changes over the past few months!

Jeff Thomas

One significant change impacting all of our manufacturing plants is the promotion of Jeff Thomas to Vice President of Manufacturing. In his new role, Jeff will enable the Manufacturing Organization to meet the challenges KCC faces to fulfill our customers' needs and expand our business. [Read Q&A with Jeff >](#)

Brock Williams

At our Tooele, Utah plant, manager Brock Williams decided to retire after more than 25 years with KCC. We are incredibly grateful for all that Brock has contributed to KCC and our manufacturing facility in Utah!

Tracy Palmer

Tracy Palmer, the former Shop Foreman at Tooele, Utah, has stepped into the role of Plant Manager. [Read Q&A with Tracy >](#)

David Domine

For our Kentucky plants, David Domine switched roles from Plant Manager at Grassland to Plant Manager at Technology. Might add a couple of miles to his commute! [Read Q&A with David >](#)

Johnny Kelley

Johnny Kelley, former Production Manager, moved into David Domine's position as Grassland Plant Manager. [Read Q&A with Johnny >](#)

ESOP CORNER

Reflecting on Our Progress by Izzy Hoffman

Over the past several months, the ESOP Committee has made meaningful strides in strengthening employee ownership awareness, building a sense of community, and developing resources that support our shared success. From organizing engaging events to launching new initiatives like the upcoming ESOP video training series, the dedication and creativity of our team have made a real impact.

Being part of a culture that values ownership, collaboration, and transparency has meant a great deal to me personally. I truly enjoy working with this incredible group of people who care deeply about making KCC a place where employee-owners feel informed, empowered, and appreciated.

As we look ahead, I'm excited about the momentum we've built and the possibilities that lie ahead. The foundation we've laid together is just the beginning, and I'm confident that with this team, the future is bright.

Curb & Adapter is Injury Free for 2 Years!

Congratulations to the Grassland Curb and Adapter Team for completing 2 years with no injuries! This is a tremendous accomplishment that requires a commitment from everyone. This represents over 200,000 hours worked without an injury. The impact this has on team members cannot be understated as they go home the way they came in. When this happens, there is a tremendous impact on the ESOP as team members get to stay on the job and are not constantly replaced and changed because of a work-related injury. There are NO workers compensation costs when we have no injuries. That means a positive impact on the ESOP because money is not spent on managing injuries. The team is already working on year 3 and ready to celebrate in 2026!

Celebrating June Anniversaries!

Congratulations to the KCC team celebrating their June anniversaries! These milestones are significant, and KCC would not thrive without everyone's dedication and effort. Here's to many more successful years!
